Florida*		Effective September 6, 2013, no cervid imports by executive order. Effective November 11, 2013, no cervid imports by rule. Exceptions allowed for zoos and temporary possession of Reindeer.	No person shall receive, possess, transport, or carry into the state by any means any live deer, elk or other species of the family Cervidae originating from out-of-state unless permitted pursuant to Chapter 68A-6 and as provided herein. (1) Zoos that meet or exceed all applicable Association of Zoos and Aquariums (AZA) accreditation standards (2013 Edition – available at http://www.lfrules.org/Gateway/reference.asp?No=Ref-03316), which are adopted and incorporated herein by reference, are authorized to receive cervids from out-of-state (except for white-tailed deer which shall not be received from out-of-state) from another facility that meets or exceeds all applicable AZA accreditation standards. (2) Any person is authorized to receive Reinder (Rangifer tarandas) temporarily, for no longer than 90 days, provided that the reinder being received have not originated from or been possessed at a premises or facility in Cloradd in a county or a county adjoining a county where CWD has been documented, and are not located at a premises or facility in Florida with other species of the family Cervidae.	NA	resuring of captive cervios is voluntary.	Implemented active surveillance of hunter-killed and road-killed deer and passive surveillance of symptomatic wild deer in summer 2002. As of May 2014, 7,607 deer have been tested, 391 from passive surveillance and 7,216 from active surveillance. No positives have been detected. FWC plans to continue with the current level of testing - approximately 600-700 free-ranging deer per year. Additional information is available at www.MyFWC.com/CWD	No ban.	No ban.	The FWC adopted in 2005 a rule that prohibits the importation or possession of the carcass of any cervid from any state or province where Chronic Wasting Disease (CWD) has been documented except boned-out meat or processed meat cuts, a hide with no head attached, anliers with a clean skull plate, finished taxidermy products, and upper canines. Additionally, any cervid carcass, regardless of origin, testing positive for CWD must be surrendered to FWC personnel.	No	No
Georgia*	The Department of Natural Resources and Department of Agriculture have joint authority over deer farms. Farmed deer are restricted to fallow, sika, and red deer, elk, caribou and their hybrids. White-tailed deer are not included as farmed deer. Pursuant to OCGA 4-4-170 through 181, the Department of Agriculture administers the deer farming license and provisions relating to health requirements, humane treatment and slaughter. Also, the DNR inspects facilities prior to Ag approval and issuance of deer farming license. Further, the Department of Natural Resources has jurisdiction over escpaed farmed deer. Pursuant to OCGA 27-5-1 through 12 (Wild Animal Act), the DNR has authority over wild animals, which include the cervid species that can be legally farmed in Georgia. Thus, anyone holding any cervid species the cervid species that can be legally farmed in Georgia. Thus, anyone holding any cervid species are required to have a wild animal license to legally possess a cervid other than white-tailed deer. Contact: Charlie Killmaster, State Deer Biologist, (706) 557-3260, charlie.killmaster @dnr.state.ga.us	No deer imports allowed.	The Georgia General Assembly passed legislation in 2006 that prohibits the importation of any cervid. Prior, the Department had promulgated regulations that prohibited the importation of any cervid.	N/A	owner or agent unless supplementary funds are made available. Farmed deer slaughtered in licensed meat establishments must be made available for sample collection and submission	DNR began a wildlife surveillance program in fall 2002. In 2002-2003, we target tested 317 cervids limited to 6 areas considered to be at greatest risk due to proximity of captive cervid facilities. Additionally, we tested 100 cervids as a part of standard health monitoring. In 2003-2004, program was expanded to statewide and over 6,500 have been collected to date. CWD has not been detected at this time. Maine*	for commercial purposes, Department of Inland Fisheries and Wildlife regulates all other imports.	To prevent the introduction of CWD into Maine and pursuant to 12 MRSA Part 12, Chapter 903, Subchapter 2, \$10103, 2 & \$10104.1, it is now illega for hunters who travel to any other states & provinces (except for NH and the provinces of OC, NB and Newfoundland/Lahrador) to hunt deer, elk, moose or caribou to transport any carcass parts that pose a risk of containing CWD prions. Hunters may return to Maine only with boned-out meat, hardened antiters (with or without skull caps), hides without the head, & finished taxidermy mounts. If still attached, skull caps should be cleaned free of brain and other tissues. It is legal for individuals to transport through the State of Maine cervid carcasses or parts destined for other states, provinces or countries. Such transportation is to occurr without undue delay & using the most reasonably direct route through Maine to the final destination for the cervid carcass or parts & in a manner that is both leak-proof & that prevents their exposure to the environment.	The Maine Department of Agriculture has		Captive/farmed deer are monitored for the presence of CWD using on-farm health monitoring practices, and by testing certain farmed deer for CWD at slaughter. Captive/farmed cervids are currently sampled for CWD testing at two USDA inspected slaughter facilities. Over 1,000 slaughtered farm raised cervids since 2001.	Approximately 500-600 hunter-killed deer are tested annually for CWD. Sampling is focused in towns containing active cervid farms, and/or winter feeding operations.	Deer baiting is illegal	No ban at this time. We are encouraging people to voluntarily phase out feeding as a disease prevention measure.	Deer that are not harvested from a state or province adjacent to Maine are not allowed to be brought into Maine unless they meet the following: boned out meat, hardened antiers, skull caps cleaned of all tissues, capes and hides with no skull, teeth, and finished taxidermy mounts. Using outreach to discourage hunters from importing high-risk tissues from out-of-state hunts. Hunters also cautioned to use urine-based lures above the reach of deer and to handle them with caution.		No
Maryland	Department of Natural Resources and Department of Agriculture. Contact: Karina Stonesifer, DNR, (301) 777-2136, karina.stonesifer@maryland.gov	No imports allowed except Accredited American Zoological Association facilities. No cervid farming. Captive owners must sterifize all their cervids or separate sexes to prevent reproduction (currently, approximately 100 animals). Exception - we now permit limited reproduction by fallow deer only, up to, but not exceeding, the number of fallow deer they are permitted to currently possess.	Possession of cervids not permitted except for approximately 7 individuals grandfathered in.	Due to positive deer discovered outside of the CWD Management Area the CWD Response Plan is activated and the CWD Management Area has been enlarged to cover all of Allegany County and the western portion of Washington County. Additional details can be found on the department's website.	No live animal testing planned; captive cervid owners required to submit dead animals for CWD testing.	As of 3/13/18 - 9,615 deer tested for CWD with 27 positive animals confirmed. Targeted surveillance has been conducted since 1999. Active surveillance statewide using hunter-harvested deer conducted 2002 – 2009. 2010 - 2015 active surveillance was conducted in Allegany County. Starting in 2017, active surveillance will be conducted within all of Allegany County and parts of Washington and Garrett Counties.	Baiting is permitted statewide, except on state-owned or managed properties.	Feeding is permitted statewide, except on state-owned or managed properties.	Carcasses from areas where CWD has been reported must be processed prior to entering the state. No spinal cord tissues or brain tissues allowed from these areas. Cleaned stulls, hides, aniters, finished taxidermy mounts, boneless meat permitted. Recent regulations limit transport of animal parts from the MD county where CWD has been found.	No	Yes
Massachusetts		Regulation prohibiting the importation of all live cervids. Previous regulations: No white-tailed deer of elk imports allowed, only farmed deer allowed are fallow, sika, and red deer.		NA - Implemented.	Mandatory testing of all captive cervid mortalities, provided funding is available.	Random testing of hunter-harvested deer and vehicle-killed moose and deer fror 2002-2011 (4530 samples from white-tailed deer and 26 from moose to date wit no positives). Federal funding ceased in 2012, thus sampling is limited to clinica suspect deer and moose.	Baiting is prohibited (during and 10 days prior to the deer hunting season).	No ban on feeding (when not related to hunting) at this time.	08/1/05: Emergency regulation restricting the importation of cervid carcass parts from states diagnosed with CWD in either captive or wild herds. Regulation became permanent 9/2005. Exceptions to the restriction include: boned out meat, hides without heads attached, clean (no meat or tissue attached) skull or skull plates with antiers attached, clean upper canine teeth (buglers, whistlers, ivorles), and finished taxidemy heads.	No	No
Michigan	Executive order No. 2004-3, 4/15/04, transferred responsibility for regulations and biosecurity of captive cervid facilities from Department of Agriculture & Rural Development to Department of Natural Resources. A complete audit of the industry was conducted by MDNR summer and early fall of 2004. MDARD will oversee disease testing of captive cervids. MDNR: Kelly Straka, 517-336-5030, strakakt @ michigan.gov; MDARD: James Averill, 800-292-3939, averillj1@ michigan.gov	Importation of cervids reviewed on a case-by-case basis. Import requirements revised in 2014. Must originate from a CWD certified and TB accredited herd. Must be imported into CWD Certified herd and current herd owner must have participated in Herd Certification Program for at least 3 years. Exporting herd must not be within 25 miles of a CWD positive in a POC in past 5 years, 75 miles from a CWD positive in a free ranging within past 10 years if single fence, or in 50 miles from a CWD positive in a free ranging within past 10 years if double fence. Fence requirements from exporting herds must met MI POC standards (10). Currently ban imports from Wisconsin, Colorado, and Wyoming. Exporting herd must not have imported animals from WI, CO, or WY in last 5 years. Individual animal to be imported will be traced to all herds resided in since birth.	Importation of cervids reviewed on a case-by- case basis. Imported animal must stay in herd for 2 years and then may only be moved to a new facility by permit. Imported animals meeting above criteria may only move to CWD certified	The CWD Management Zone includes 5 counties (Clinton, Eaton, Ingham, Ionia, and Shiawasse). The CWD Core Area (DMU 333) within the Management Zone has been expanded to include 20 townships (Alaiedon, Bath, Danby, Delhi, Delta, Dewitt, Eagle, Lansing, Meridian, Olive, Oneida, Portland, Riley, Roxand, Victor, Watertown, Westphalia, Wheatfield, Williamstown, Woodhull). A CWD Surveillance Area (DMU 359) was created to include 9 townships (Aetna, Austin, Cato, Deeffield, Hinton, Mesosta, Morton, Reynolds, and Winfield) around a CWD positive privately-owned cervid facility. In Cother 2017, a 9-township (Douglass, Eureka Fairphain, Maple Valley, Montcalm, Oakfield, Pine. Sidney, and Spencer) CWD Core Area was established around a CWD positive wild white-tailed deer in Montcalm county. The Management and Surveillance Zones and leating goals for 2018 are currently being discussed and plan to be finalized late summer 2018. House Bill 4424 passed October 2017 banning the importation of cervid carcasses from ANY state or province into Michigan. See Column J for more detail.	Mandatory CWD surveillance; all death losses due to illness in privately owned cervid (POC) herds over 12 months of age, and 25% of hunted/culled must be reported to Department of Agriculture & Rural Development and submitted for CWD testing. CWD is a reportable disease and if suspected, must be reported to MDARD immediately. Voluntary Herd Certification Program: must test all death losses greater than 12 months of age.	As of 03/08/18, have tested 64,359 white-tailed deer, 1,631 elk, and 75 moose. The first positive free-ranging white-tailed deer was found in May 2015. The 2018-19 CWD surveillance and monitoring goals and zones are under discussion. Targeted surveillance will continue in the remainder of the state for deer, elk, and moose.	Baiting banned in Alcona, Alpena Clinton, Eaton, Ingham, Ionia, Kent, Montcalm, Montmorency,Oscoda, and Shiawassee counties. Baiting is legal in the rest of the state from Sept. 15 - Jan 1 and cannot exceed 2 gallons. Must be dispersed over a minimum of a 10 x 10 ft area.	locations where deer congregate may not begin prior to the Monday following January and must end by May 15 unless otherwise specified in the feeding permit. Feed must be placed at least 1 mile from livestock, farmed	Effective 10/17/17: Prohibit importation of any carcass of free-ranging deer, elk, or moose into Michigan from any state or province regardless of whether or not that state or province has detected CWD in one of their cervid populations. Deboned meat, quarters or parts that do not have spinal column or head attached, antlers, antlers attached to a skull cap cleaned of all brain and muscle tissue, hides cleaned of excess tissue or blood, upper canine teeth, finished taxidermy mount, and tissue imported for use by a diagnostic or research laboratory are all allowed to be imported into Michigan. Any person bringing full carcasses or parts other than those listed above is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not less than \$500 or more than \$2,000, or both, and the cost of prosecution.	deer in Kent County in 2008 and two CWD positive white- tailed deer in	Yes. The first white- tailed deer in 2015. Currently at 57 positive WTD.
Minnesota	MN Board of Animal Health regulates all captive deer, elk, and other cervids. Contact: Dr. Linda Glaser, linda glaser@state.mn.us	Imported animal must have RFID. Must have ICVI with 14 days of importation.	registered with the MN Board of Animal Health. CWD surveillance is mandatory for captive cervids that die. Additionally, laws regulate fencing, escapes, animal transfers, importation, animal identification, and herd inventories. There	Minnesota DNR initiated a CWD response plan, after finding CWD in a small geographic area in Fillmore County during fall 2016. 11 wild white tailed deer tested positive from November 2016 to March 2017 and another 6 were detected during fall 2017. New regulations that define a recreational feeding ban in a 5-county area, CWD Management Zone, mandatory sampling of all harvested deer inside this zone, and carcass movement restrictions within that zone were put into place in winter 2017.	Mandatory testing for all captive cervids.	Nearly 60,000 hunter-harvested deer samples have been collected statewide since 2002. The first case of CWD in a free-ranging white-tailed deer was discovered in January 2011, from an adult doe harvested by a hunter in late November 2010 in Olmsted County. Minnesota DNR initiated its CWD Respons Plan, which included an earist survey and additional sampling of deer within 10 miles of the CWD positive deer, and the creation of a CWD Management Zone. Over 5,000 samples had been collected in this area since the first discovery of the disease with no additional positive deer detected. Intensive surveillance efforts were discontinued in this area, following 3 consecutive years of not findin any additional cases of CWD in wild deer. In fall 2016, 3 CWD wild deer were detected in Fillmore County and Minnesota DNR initiated its CWD Response Plan again. Through intense sampling efforts around a 10-mile area of where these deer were found, an additional 8 positive wild deer were detected bringing the total number of positives to 11. Most recently during fall 2017, an additional 6 deer were detected with CWD also from this small geographic area. The total is 17 wild deer detected with the disease in Fillmore County.	No baiting allowed.	5 counties surrounding the CWD-positive deer. This ban was not only for recreational feeding of deer, but also banned the use of any attractants that could concentrate deer.	and antiers attached to skull caps that are cleaned of all brain tissue.	Yes	Yes
Mississippi*	Mississippi Department of Wildlife, Fisheries & Parks (MDWFP) has jurisdiction over white-tailedeer, Department of Agriculture & the Board of Animal Health has jurisdiction over exotics. As of July 1, 2006, MDWFP has plenary power to regulate all commercial and noncommercial wild animal enclosures.	f	chronic wasting disease, then all cervids in the enclosure shall be deemed a threat to native wildlife and to public health and may be killed and disposed of by the state; The owner of an enclosure shall comply with any testing of white-tailed deer harvested within the enclosure as may be required by the department. If chronic wasting disease is diagnosed within five (5) miles of the enclosure, the owner of such enclosure shall allow department personnel to enter the enclosure to utilize lethal collection methods to obtain tissue samples for testing. If chronic wasting disease is diagnosed within the enclosure, the owner shall allow department enclosure, the owner shall allow department	In process of surveying number, location & size of all wild animal enclosures in the state & types of animals held or hunted in such enclosures; and of setting regulations for any facility that prevents the free ingress & egress of native or nonative cerviols. § 49-7-58.4 Regulation of normarcial & noncommercial wild animal enclosures & facilities preventing free ingress & egress of native & nonnative cerviols. Missouri*	On March 1, 2010 the Missouri Department of Agriculture (MDA) assumed the role of regulating all cervid herds (elk, mule deer, and white-tailed deer) that are enrolled in the State's voluntary CWD monitoring program. Elk are considered livestock's and therefore solely under the jurisdiction of MDA. The Missouri Department of Conservation (MDC) oversees the permitting of captive cervid facilities. On January 30, 2015, MDC implemented new captive cervid regulations requiring mandatory enrollment in CWD Herd Certification Programs. "THE REGULATIONS EFFECTIVE '130/15ARE CURRENTLY NOT ENFORCEABLE DUE TO ONGOING LITIGATION' COntact Person for MDA is Dr. Linda Hickam, State Veterinarian, Linda Hickam@mda.mo.gov, (573) 751-3377. Contact person for MDC is Jasmine Batten, Wildlife Disease Coordinator, Jasmine Batten@mdc.mo.gov, (573) 815-7901 ext. 2934	In addition to standard regulations, see the CWD regulations for captive cervids and wildlife.	MDC implemented a number of regulation changes for captive cervids (white-tailed deer, mule-deer and their hybrids) effective January 30, 2015, including: a ban on the importation of live white-tailed deer, mule deer, and their hybrids: the adoption of new fencing standards (single 8' fence with specifications for construction) for all existing and new facilities (to be in compliance within 18 months); mandatory CWD testing in all mortalities over six months of age for both breeders and big game hunting preserves; new record keeping requirements (5 year refeation of all purchases and sales); a 5-year prohibition on the construction of new captive cervid facilities within 25 miles of any confirmed CWD-positive deer; a ban on the holding of white-tailed deer, mule-deer and their hybrids in temporary exhibit facilities. *ABOVE REGULATIONS ARE CURRENTLY NOT ENFORCEABLE DUE TO ONGOING LITIGATION*	the piacement of grain, sait, minerais and other consumables; rescindment of an antier-point restriction; an increase in the number of antierless deer permits available from 1 to 2) will be expanded to all 41 counties for the fall 2017. Additionally, a regulation requiring the mandatory presentation of deer harvested within Management Zone counties on opening weekend of firearms season for CWD sampling, has been ammended to allow for the designation of specific counties in the	approved difficult washing disease relations of certification program. Additionally, CWD testing is required for all mortalities over the age of 6-months. The rule allows permitees to apply for an exemption from testing requirements in the event of mass-casualty events; MDC reserves the right to collect a samples during these events if so desired. In the event of a positive CWD test result, captive cervid producers must comply with a herd disease response plan approved by MDC. "THE REGULATIONS EFFECTIVE	Since 2001, over 77,000 free-ranging deer have been tested for CWD in Missouri Active statewide surveillance focuses on hunter-harvested male deer collected at taxidemists throughout the state, with approximately one-half of the state sampled every year. Opportunistic testing of sick deer also occurs statewide. Sampling intensity is increased in designated "CWD Management Zone" (25 of 41 Management Zone counteis for fall 2017). Agency-directed targeted culling occurs in CWD "Core Areas" (areas of known disease foci) from January to March.	Hunting deer, turkey and waterfowl over bait has been prohibited for many years in	Grain, salt products, minerals and other consumable natural or manufactured products used to attract deer are prohibited in 41 "CWD Management Zone" counties.	As of March 1, 2010 the following verbiage has been added to the Wildlife Code of Missouri "Wildlife legally taken and exported from another state or country may also be shipped into Missouri by common carrier, except cervid carcasses or cervid carcasses are carrier, except cervid carcasses or cervid carcasses are carease, parts. The importation, transportation, or possession of cervid carcasses or cervid carcass parts taken from or obtained outside of Missouri is prohibited, except for meat that is cut and wrapped; meat that has been boned out; quarters or other portions of meat with no part of the spinal column or head attached; hides or capes from which all excess tissue has been removed; antlers; antlers attached to skull plates or skulls cleaned or all muscle and brain tissue; upper cannie teeth; and finished taxidermy products. Carcasses or parts of carcasses with the spinal column or head attached my be transported into the state only if they are reported to an agent of the department within twenty-four (24) hours of entering the state and then taken to a license meat processor or taxidermist within seventy-two (72) hours of entry. Licensed meat processors and taxidermists shall dispose of the discarded tissue in a properly permitted landfill.	counties). In total, eleven (11) CWD-positive deer were detected in these facilities. One of these facilities is a hunting preserve tha remains in operation under our person.	in Macon County). As of November 2017, a total of forty-two (42) free-ranging white-tailed deer in seven counties have tested positive for CWD in Missouri. Twenty-three (23) cases were within 3 miles of the Macon Co. positive captive facility. CWD-positive deer the value of the county of the cou
Montana	Fish, Wildlife & Parks has jurisdiction over licensing, reports, record keeping, exterior fencing, classification, unlawful capture, inspection, and enforcement of those activities. Department of Livestock has authority over marking, inspection, transport, importation, quarantine, hold orders, interior facilities, health, and enforcement of those activities. Contact: Wildlife - Jannifer Ramsey/ JRamsey/@mt.gov; Captive - Michael Lee, milee@mt.gov,	Certificate of veterinary inspection and prior import permit required. Must be importing to alternative livestock ranch licensed to receive that species; official ID tag; trace back capabilities; no red, axis, rusa, sambar, sika or roe deer imports; white-tailed deer must originate west of the 100th mertidian and be certified free of meningeal worm parasites and dorsal spine larvae; elk must be free of red deer genes; cervidae must be TB and Brucellosis tested and certified Para TB free. Anthelimitic treatment required. Import fee charged to Montana importer. Not licensing new captive facilities; licensee may not charge a fee or remuneration for shooting of captive animals; no transfer of existing licenses allowed.	where CWD is endemic or has been diagnosed. Cervid must originate from a herd that has participated in an approved CWD surveillance program for at least 60 months prior to import, no cervidae have been added to exporting herd within last 60 months from a herd of lesser CWL status; if exporting state has any confirmed	commission in April 2018. If approved, this plan will replace the 2014 CWD Plan for Free Ranging Wildlife In Montana. The 2017 plan is a three-part action-specific	samples submitted for testing; test eligible age	Have done state wide sampling since 1998, testing over 17,200 cervids (deer, elk, and moose) including targeted samples from animals exhibiting clinical symptoms. The first year of the surveillance plan from the Surveillance and Response Plan was initiated in fall 2017. The plan calls for continued testing of symptomatic animals accross the state, plus a weighted surveillance strategy focused primarily on hunter harvested mule deer, and will rotate annually to priority survieilance areas. Adult road-killed animals are also collected for testing within surveillance areas. Aectal biopsies will be collected and tested for CWD and radio collars will be applied to monitor potential movement of deer near the area of the Philipsburg game farm where CWD was detected in 1998. The 201 surveillance effort resulted in detection of 6 CWD positive deer in south central Montana, and one CWD positive deer in North Central Montana. Special CWD hunts were put in place within initial Response Area (IRA) around each detection location to obtain samples to determine prevalence and geographic distribution of the disease.	7	Feeding of game animals is prohibited. Legislation passed in 2009 providing for increased penalties for feeding of ungulates.	In February of 2006, the Montana FWP Commission passed a prohibition on the importation of heads and spinal cords from deer, elk, and moose harvester in states or provinces that have experienced CWD in their wildlife populations or in captive cervid populations in those states or provinces. Transport of processed meat, deboned meat, quatrens, indies, antlers and/or skull caps without any nervous tissue attached, finished taxidermy heads, and ivories are not affected by the prohibition. The 65th Legislature passed Senate Bill 187 in April of 2017 which took the language from the Commission Rule and codified it into state statute. The satute will took effect January 1, 2018. Upon detection of CWD in Montana, an initial resonse area (IRA) was designated around each detection. Special CWD hunts occurred within those IRA. Transport restriction zones were also designated around the IRA to prevent transportation of infectious materials to other parts of the state. Parts that are allowed out of the TRZ include: meat that is cut and wrapped or meat that has been separated from the bone, quarters or other portions of meat with no part of the spinal column or head attached, hides with no heads attached, skull plates or anthers with no meat or tissue attached, skulls that have been boiled and cleaned to remove flesh and tissue	Yes - one captive ell herd was diagnosed as CWD positive in 1998. That herd of eighty-seven elk was depopulated with 9 animals diagnosed as CWD positive. A trace forward herd consisting of 29 elk was also	s surveillance effort, 6 positive deer were detected in South Central Montana. One positive deer was detected in North Central Montana
Nebraska	Department of Agriculture. Contact: Dr. Dennis Hughes, State Veterinarian, Nebraska Dept. of Agriculture, dennis.hughes@nebraska.gov	Transport prohibited if exposed, infected, or suspected to have an infectious, contagious or transmissible disease; identification number required; cannot be moved through more than one concentration point in 90 days. Cervids cannot be moved out of endemic counties into non-endemic counties or put of state.	CVI for elk or mule deer must verify: 1) the herd of origin has had no diagnosis or epidemiological evidence of CVID for the past 5 years; or 2) The herd has been enrolled 5 or more years in a state approved CWID herd monitoring program and current status has been recorded on CVI.	NA	All captive cervids 16 months or older that die from illness, slaughter, hunting or any other cause shall be reported within 24 hours and submitted for CWD testing.	Since 1997 have checked over 51,000 hunter harvested deer and over 465 hunter harvested elk. Have tested approximately 2100 agency harvested deer and animals exhibiting clinical signs. Have confirmed over 499 positive deer and approximately 10 positive elk. Have confirmed CWD in 40 counties.	er Illegal to hunt within 200 yards of an area that has been baited in the last 10 days prior to hunting season. Baiting is legal, but hunting over bait is not legal.	Not banned at this time, but it is illegal to hur over food.	nt NA	Yes	Yes
Nevada*	Nevada Department of Wildlife. Contact: Dr. Peregrine Wolff, (775) 353-3753, pwolff@ndow.org. The Nevada Department of Agriculture state veterinarian has regulatory authority over captive cervids. Contact: Dr. Michael T. Greenlee, State Veterinarian, Nevada Department of Agriculture; michael.orgenlee@aori.state.nv.us			2005 legislation removed elk from the alternative livestock list so elk cannot be ranched as a captive cervid. No captive elk, white-tailed deer, or mule deer ranches exist in Nevada.	No captive cervid ranches exist in the state. This was allowed until July 2005.	Surveillance and testing have been conducted since 1998. To date, 2481 mule deer and 569 elk have been tested for CWD across the entire state, and all were negative. Current focus on targeted surveillance animals in the Eastern 1/3 of the state (on UT border). This includes hunter harvest, animals demonstarting clinical signs consistent with CWD and roadkilled animals.		NA	NA .	No	No
New Hampshire	NH Fish & Game Department. Contact: Dan Bergeron, (603) 271-2461, Daniel Bergeron @ wildlife.nh.gov. NH Department of Agriculture, Markets & Food, Contact: Dr. Sieven Crawford, State Veterinarian, (603) 271-2404, scrawford@agr.state.nh.us	Dept. of Ag. requires certificate of veterinary innspection and import permit. Certificate shall certify that cervids are individually identified with permanent metal ear tag, legible tattoo or microchip, that all individuals on premises have been inspected, that cervids have never been exposed to animals confirmed to have CWD or animals exposed to confirmed CWD animals. Fish and Game prohibits the importation of native cervid species (white-tailed deer and moose).	Dept. of Ag. requires that cervids can only be imported into herds participating in NH or federa CWD monitoring program at a level consistent with 5 years participation. Herds of origin must meet at least the same standard. Once imported, individual cervids may never be transferred to another herd within New Hampshire.	In light of New York's testing of over 7,300 deer in their CWD Containment Area over a 5-year period with no additional positives, and their decision to officially decommission the containment area in 2010, New Hampshire exempted New York from its list of CWD postive jurisdictions to again allow carcass importation from New York beginnig in 2012. New Hampshire hunters are being warned that at present, transport of NY deer into or though MA and VT remains illegal.	Voluntary CWD testing and certification program through state Dept. of Agriculture	Statewide monitoring & surveillance of hunter killed wild deer began in 2002. Objective is to test a minimum of 400 samples annually plus targeted surveillance. From 2002 through 2016, a total of 5,817 hunter killed deer have been tested statewide. None have tested positive to date.	No ban at this time.	No ban, encouraging people not to feed deer.	Rules prohibit the importation of hunter-killed cervid carcasses or parts of cervid carcasses from CWD positive jurisdictions except for: de-boned meat, antlers, antlers attached to skull caps from which all soft tissue has been removed, upper canine teeth, hides or capes with no part of the head attached finished taxidermy mounts, and tissue prepared and packaged for use by diagnostic or research laboratories. CWD positive jurisdictions are defined as states or provinces in which CWD has been found in wild or captive cervids. Beginning in 2012, New York has been exempted from New Hampshire's list o CWD postive jurisdictions.	No	No

Rules in place that establish a state herd certification program for captive cervid facilities.	age that die for any reason and testing of all captive cervids displaying symptoms characteristic of the disease required. Licensees are required to submit cervid heads	All animals that are exhibiting symptoms characteristic of CWD are tested. Statewide surveillance with an objective of collecting a minimum of 1,000 samples was conducted in 2003, 2008, and 2013, and will continue to occur every five years. As of October 13, 2017, a total of 7,665 white-tailed deer and elk have been tested (267 clinical, 7,419 routine surveillance). CWD has not bee detected.	No ban at this time.	No ban at this time.	Ban on importation, transportation, or possession of cervid carcasses or carcass parts from any state or province where CWD occurs, except: meat this cut and wrapped, quarters of other portions of meat with no part of the spini column or head attached, meat that has been boned out, caped hides, clean skull plates, antlers, cleaned teeth, and finished taxidermy products. All products above must be properly labeled according to rule. Rule [15A NCAC 10B.0124] became effective May 1, 2006.	al No	No
North Dakota	Carlson, bwcarlson@nd.gov (701)328-2654. North Dakota Game & Fish: Contact Dr. Dan	Facilities must be approved prior to ownership of deer and elk, and deer owners must obtain a non-traditional livestock license. Captive cervids must meet standards of risk assessment. Must be free of all contagious and infectious disease. Genetic testing (for purity) required for elk in ND zones 1 & 2. Animals must not be infected with or exposed to Johne's disease. Must be negative to two official brucellosis tests, one being the CF. Whole herd TB test within 12 months. In lieu of testing, Brucellosis free and TB-free herd status is recognized. Annual inventory reports required for all cervids. Deer must be individually identified with USDA silver tag by 12 months of age, and elk by 24 months of age. Additional restrictions apply to reindeer, red deer, and red deer/elk hybrids.	For importation: wust complete CWVD 5-Year Risk Assessment Questionnaire (or have 5 year status) and fax to Board of Animal Health prior to entry permit issuance; cervids and originating herds must have no history of emadiation, depression, excessive sallvation or thirst, or neurological disease. If symptoms arise, diagnostic measures must be taken to rule out a TSE.		Board of Animal Health has mandatory inventory (since 1993). CWD testing was mandatory (since 1998) for farmed elk, white-tailed deer and mule deer over 12 months of age that die for any reason. As of November 1 2013, over 9900 farmed deer and elk have been tested, with no evidence of CWD. As of October 2017 participation in the CWD testing program has become voluntary.	ND Game & Fish Department has conducted Targeted Surveillance of free- ranging cervids since 1996. Hunter-harvested deer and elk surveillance began in 2002. As of April 1 2017, >24,000 whitetail and mule deer, >1100 elk, and +350 mose have been tested. Nine positive cases have been found; one each in 2009, 2010, and 2011 and 2 each in 2013, 2014 ansd 2016. The first positive was harvested in Sioux County in 2009. Eight have since been harvested and found in Grant County. 8/9 were mule deer and 1 was a white-tailed deer.	Deer Hunting Units 3E1, 3E2, 3F1, 3F2, 3C west of the Missour River	Banned in State Wildlife Management Areas and Federal Lands.	08/27/03: Ban on importation of whole carcasses and carcass parts of white-tailed deer, mule deer and elk from areas within states or provinces with documented occurrences of CWD in wild populations and private game farms Hunters may import the following parts: meat that is cut and wrapped (commercially or privately), quarters or other portions of meat with no part of spinal column or head attached, boned out meat, hides without heads attached, clean (no meat or tissue attached) skull plates with antiers attached antiers with no meat or tissue attached, upper canine teeth (buglers, whistlers or ivories), and finished taxidermy heads. The DOA prohibits the importation of any cervid from a county or adjoining county diagnosed with CWD and allows importation from only states with approved USDA APHIS CWD Herd Certification Programs that meet the WV DOA CWD Herd Certification Program standards.	No	WV DOA surveillance program is mandatory and requires testing of all mortality of captive cervids >12 months old.	WV DNR conducts statewide surveillance using a stratified sample of road kills initiated in 2002 and continues at present. For sampling the statewide surveillance/monitoring populations consist of 3 areas (i.e. CWD Containment/Management Area, 4 counties adjacent to Hampshire, Hardy, and Morgan counties and the remainder of the state comprised of 48 counties). Monitoring within the CWD Containment/Management Area consists primarily of samples from hunter harvested deer. Surveillance outside this area is primarily quota driven samples from road kill deer.	on public land statewide between September 1 and December 31 and during spring gobbler season.	such feeding shall not cause, or be done in a manner that would be reasonably anticipated to cause, a congregation of cervids or other wildlife). It is illegal to feed any wildlife on public land statewide between September 1	tissue has been removed, cervid canines, and finished taxidermy heads may be imported. Hunters in West Virginia are prohibited from transporting dead	No	Yes
Wisconsin	Department of Agriculture, Trade and Consumer Protection registers and regulates captive deer farms and regulates importation of all farmed cervids. Contact at DATCP Dr. Amy Horn-Delzer, Amy, Horn-Delzer, Camy, Horn-Delzer, Camp, Horn-Delzer	Current CVI and import permit is required. Contact (608) 224-4886 or visit https://datcp.wi.gov/Pages/Programs_Services/Deer ElkCervidMvmt.aspx for detailed information.	requirements. 4) Mandatory testing on all dead/harvested farm-raised deer 12 months or over for herds enrolled in CWD Herd Status Program. Surveillance testing required for herds not enrolled in state monitoring program for dead/harvested deer 16 months or over. 5)		slaughtered at a slaughter facility 12 months of age or older. Non-enrolled herds must test deer	There is no charge to hunters for testing their deer, but testing is not available in all parts of the state every year. Over 209.500 wild deer have been tested statewide since 1999, with over 4,100 testing positive, all but 26 of which were found in the Southern Farmland Zone in the southern part of the State. From April 1, 2017 to March 31, 2018, Wisconsin sampled 9,767 deer, with 596 of those testing positive.	to enact a ban on the baiting and feeding of deer in any county within 10 miles of a captive or free roaming deer that tests positive for either CWD or Bovine Tuberculosis (Tb). In August 2017, an Act signed into law to amend current state statute did the following: remove deer baiting and feeding prohibitions in counties where 36 months have passed since any confirmed positive test for chronic wasting disease or bovine tuberculosis (Tb) within the countyr, and remove deer baiting and feeding prohibitions in adjacent counties where 24 months have passed since any confirmed positive test where 24 months have passed since any confirmed positive test for chronic wasting disease or	Cervid feeding regulation is under the direction of Wisconsin Department of Natural Resources. Under state statute 29.336, Wis. Stats, the Wisconsin Department of Natural Resources is required to enact a ban on the baiting and feeding of deer in any county within 10 miles of a captive or free-roaming deer that tests positive for either CWD or Bovine Tuberculosis (Tb). In August 2017, an Act signed into law to amend current state statute did the following: remove deer baiting and feeding prohibitions in counties where 36 months have passed since any confirmed positive test for chronic wasting disease or bovine tuberculosis (Tb) within the county: and remove deer baiting and feeding prohibitions in adjacent counties where 24 months have passed since any confirmed positive test for chronic wasting disease or bovine tuberculosis (Tb) within a 10-mile radius of the county. The 24/36-month period would start over again with each expositive test result as they are confirmed. Please check the WI DNR baiting and feeding webpage freult is they are confirmed. Please check the WI DNR baiting and feeding webpage freult is not prohibited, it is restrictle.	of Natural resources. See http://dir.w.jov/topic/wildlifehabitat/carcassmovement.html for a complete outline of carcass movement restrictions. The movement of both whole wild-deer carcasses and certain parts of those carcasses from a CWD-affected county (a county with either a wild or captive animal that has been confirmed to be positive for CWD in the county or portion of the county is within a 10-mile radius of a wild or captive animal that has been confirmed to be positive for CWD) is restricted. Carcasses can only be moved within these counties an adjacent county. However, hunters are allowed to take whole cervid carcasses or any parts of carcasses harvested in the CWD-affected counties or in any state or province where CWD has been found, into any part of Wisconsin, provided the carcass (or nonexempt parts) are taken to a licensed taxidermist or meat processor within 72 hours of registering a Wisconsin deer, or within 72 hours of entering Wisconsin from another state. Only the following parts of wild cervids are exempt from these regulations: Meat that is cut and wrapped (either commercially or privately) Quarters or other portions of meat to which no part of the spinal column is attached Meat that has been deboned Meat that has been deboned	Eleven farms that have had a positive CWD cervid have been depopulated as of March, 2018. One CWD infected exhibition farm and 5 hunting ranches currently are allowed	free-ranging white- tailed deer have been identified in Wisconsin
Wyoming*	The Wyoming Game and Fish Department (WGFD) has jurisdiction over import and possession of cervids. WGFD contact: Mary Wood: mary.wood@wyo.gov	1) Certificate of veterinary inspection 2) negative brucellosis test withn 30 days, 3) negative TB test within 90 days, 4) statement that no animal on the premise of origin is known to be infected with or to be exposed to Mycobacterium paratuberculosis, 5) 60 day quarantine prior to entry with 2 negative baermann tests for Elaphostrongylinae parasites and 2 negative fecal sedimentations for large american liver flukes 6) 180 day quarantine post entry with negative baermann fecals for Elaphostrongylinae parasites every 30 days 7) must originate from herds CWD free for at least 5 years 8) free of ticks, mites, and lice 9) all lelk must be genetically tested for hybridization and test as pure rocky mountain elk. 10) WGFD import permit.	No imports of cervids unless they come from monitored herds free of CWD for at least 5 years.	New CWD management plan adopted in April, 2016.	Captive cervids are not allowed; single exemption allowed; single exempted ranch has opted not to import any cervid. No mandatory testing for single exempted ranch.		The department may issue baiting permits to landowners for specific sites on private land where conditions exist which are limiting the ability to take his gard.		Importation into Wyoming of any deer, elk, or moose taken from any state, province, or country within areas designated as positive for CWD is restricted—such animal carcasses may only be transported into Wyoming to a private residence for processing, to a taxidermist, to a processor, or to a CWD sample collection site in Wyoming provided the head and all portions of the spinal column are disposed of in an approved landfill. Within Wyoming, transport of deer, elk, or moose taken or possessed from any hunt area in Wyoming to another hunt area within Wyoming or any other state, province or country is restricted—such animal carcasses may only be transported in Wyoming to a camp, a private residence for processing, to a taxidermist, to a processor, or to a CWD sample collection site in Wyoming provided the head and all portions of the spinal column remain at the site of the kill or are disposed of in any approved landfill in Wyoming.		Yes - white-tailed deer, mule deer, elk, and moose

Quebec	The Ministère des Forèts, de la Faune et des Parcs (MFFP) is in charge of carrying out the Act respecting the conservation and development of wildlife (R.S.Q., c. C-61.1) over captive and free ranging cervids. Contact: Isabelle Laurion, isabelle Laurion, isabelle Laurion (B mfp. gouv.qc.ca The Minister of Agriculture, Fisheries and Food (MAPAQ) is in charge of carrying out the Food Products Act (chapter P-29) and the Animal Health Protection Act (R.S.Q., c. P-42) over captive cervide. Contact: Isabelle McKenzie, isabelle.mckenzie@mapaq.gouv.qc.ca.	Transportation authorization permit (TAP) must be issued by CFIA before animals are moved.	In April 2001, the Regulation respecting the health certification of imported animals (R.S.Q., c. P-42), enacted by Order in Council, made it mandatory for operators to have a certificate for all farmed cervids imported into Quebe issued by the chief veterinarian or other competent officer of the province or of the country of origin attesting that the animals do not have CWD. To bolster the Regulation, in June 2001, MAPAQ established an import protocol according to which importers must have prior authorization to import cervids into Quebe from the Director of the "Direction de la santé et du bien-être des animaux" (SSBEA). On February 26, 2009, the Regulation, respecting the identification and traceability of certain animas has been amended to include cervids The cervid producers' obligations are to: register with ATQ; affix identification tags, report the entry, removal, disappearance or death of a cervid; The cervid producers' obligations are to: register with ATQ; affix identification tags, report the entry, removal, disappearance or death of a cervid; The cervid producers' obligations are to: register with ATQ; affix identification tags, report the entry, removal, fosted or invalidated tag); report cessation of activities or transfer of ownership.		Since february 2018, the Canadian Sheep Federation is the Regional Administrator of the CFIA's voluntary herd certification program for Québec cervid producers. MAPAQ conducts a CWD abattoir surveillance. The monitoring in slaughterhouses under provincial inspection started in september 2007 and in slaughter-houses under federal inspection started in april 2010. Between 2002 until January 2018, 22 011 farmed cervids were lested. All results to date are negative for CWD.	A total of 338 free ranging white-tailed deer have been opportunistically tested from 2000-2006. In October 2007, MFFP began a structured surveillance program using mainly road-killed deer sampling in the southern part of the province. From October 2007 to December 2013 the program led to the collection of more than 4 400 free ranging white-tailed deer. Between 2011 and 2017, more than 4 800 additional samples were collected on harvested white-tailed deer. To date, all samples have been negative for CWD.	No ban at this time.	MFFP recommends not to feed deer.	As of January 2012, the possession of full carcasses or any part of the brain, spinal cord, eyes, retropharyngeal lymph nodes, tonsils, testicles or internal organs of cervids (except caribou) killed outside Québec is prohibited. That prohibition does not apply to the following body parts: boneless meat, quarters without pieces of spinal column or head attached, degreased or tanned skin and hide, antiers without velved, disinfected skull plates without attached meat or tissue, teeth without attached meat or tissue and any piece mounted by a taxidermist.		No
Saskatchewan	Saskatchewan Agriculture has primary responsibility for farmed cervids: contact Dr. Betty Althouse, CVO Animal Health Unit, Livestock Branch. Saskatchewan Environment has primary authority for captive cervids held in zoos, and other non- game farm facilities. Also final authority for all cervid imports: contact Katherine Mehl; Fish, Wildlife and Lands Branch.	program, permits for import, slaughter processing requirements, and prohibit game farming for Sika deer; Red deer; and elk-Red deer hybrids. Other Captive Cervids: The Wildlife Regulations, 1981 and The Captive Wildlife Regulations, at respectively: http://news.up.gov.sk.ca/documents/English/Regulations/Regulations/W13-181.pdf ; and	The Domestic Game Farm Animal Regulations require enrollment of licencees in the mandatory provincial CWD surveillance program. All cervid deaths (: 12 months of age) must be reported and submitted for CWD testing, including slaughter animals. Physical inventories are completed as required, annually under the current CWD surveillance program. Imported cervids must originate from a herd with a documented history, at least, equivalent to a herd status of Level B, or above, on the National CWD Voluntary Herd Certification Program.	Saskatchewan has developed import guidelines (written by Ministries of Agriculture and Environment) for evaluating the risk of importing domestic game farm animals from other jurisdictions. Import requests are evaluated by both Ministries, with Environment having legislative authority to sign the import permit. The process for importation of game farm animals into Saskatchewan is being reviewed by the Ministries of Agriculture and Environment. The Domestic Game Farm Animal regulations are being reviewed and updated in 2018 Changes to the Federal response to CWD in farmed cervids April 1, 2018 require development of new provincial policies for reponse to CWD-positive farmed cervids.	SK began a mandatory CWD surveillance program Dec 31-01; mandatory for all licencees, and associated farmed cervids, regulated under <i>The Domestic Game Farm Animal Regulations</i> . Must report all deaths within 24 hours and submit samples for CWD testing from ALL cervids deaths (e 12 months of age), within 15 days. Laboratory testing fees, for CWD, are paid by the province. On-farm physical inventory and compliance assessment annually. To date (March 19, 2018) 90 game farms within SK have tested positive for CWD. There are approximately 282 game farms licenced; 180 with animals (-9,462 cervids); of those farms 22 are enrolled on the National CWD Voluntary Herd Certification Program.	Saskatchewan operated a CWD hunter surveillance program from 1997 to 2012. During this time, 45,434 wild cervids were tested (including targeted surveillance), with 387 CWD-positive animals found. In 2014 and 2015, hunter surveillance was not offered; but, targeted samples of sick or dead animals were collected by conservation officers and collar-marked research animals were also tested. Of these, 34/118 animals tested CWD-positive. Testing of hunter submissions was restarted in 2015, and remains ongoing. The total number of wild cervids tested, from 1997 to the end of 2017, was 47,015. Per-species CWD-positives vs total testing, included: mule deer (465/28,889), white-tailed deer (115/16,259), elk (121,619), and moose (1/248). In all, 593 CWD-positive animals were found, of 47,015 tested. In 2017, 96 of 825 animals tested, were CWD-positive as follows: mule deer (78/327), white-tailed deer (17/388), elk (1/42), and moose (0/68). There are currently 40 wildlife management zones (WM2) showing at least a single occurrence of infection. Eradication of CWD from wild cervid populations in SK is no longer considered to be a realistic option. Data and mapping can be found at http://www.cwhc-rcsf.ca/cwd.php		No	No	Yes	Yes
